Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,5,8-21,24-35 and 37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1,5,8-21 and 24-34 is/are allowed.
- 6) ☒ Claim(s) 35 and 37 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35, 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolter (4,794,918).

With respect to claims 35, 37, Wolter discloses a "fixation" or cover plate (34) having an opening (6) for a screw (opening (6) is not clearly shown in FIG.6 but all embodiments have openings) and a lower surface with a plurality of grooves extending partially through the thickness of the plate located in the roughened surface (33) as set forth in column 4, lines 56-68, column 5, lines 1-3.

The fixation or cover plate of Wolter is fully capable of performing the function recited in the claim. The cover plate is intended to restrain a screw (3) so clearly it could restrain a pin or any other elements placed underneath the plate. The opening (6) is intended to receive a screw (24) so clearly any screw (including bone screw) could be passed through the opening for any type of fixation desired. Although the grooves (33) are small, they are large enough to accommodate and restrain the bent end of the smallest wires encompassed by applicant's definition of a pin as given on page 8, lines 4-10 of the specification.

In Figure 10, the groove (45) reads on the claimed groove. The groove is capable of accommodating and restraining the bent end of a pin. In FIG.6 the groove extends in the fixation plate to an edge thereof at which the groove opens outwardly of the plate; and, in FIG.10, a groove having a rectangular cross section.

Allowable Subject Matter

Claims 1,5,8-21,24-34 are allowed.

Response to Amendment

Applicant's arguments filed 2/3/05 have been fully considered but they are not persuasive. Applicant stated that the plate structure of the invention is therefore clearly distinguished from Wolter and serves an entirely different purpose. First, applicant's attention is again directed to FIG.6 of Wolter where the groove opens outwardly of the plate. In response to applicant's argument that the plate serves different purpose, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
